

## PRE-PRESS EXPELLER ZY283-3

### **General Description:**

Pre-press Expeller Model ZY283-3, a screw press for continues production, is suitable either for production procedure of "pre-pressing solvent extracting" or tandem pressing and for processing materials of high oil content, such as peanuts, cotton seed, rape seed, sunflower seed etc.

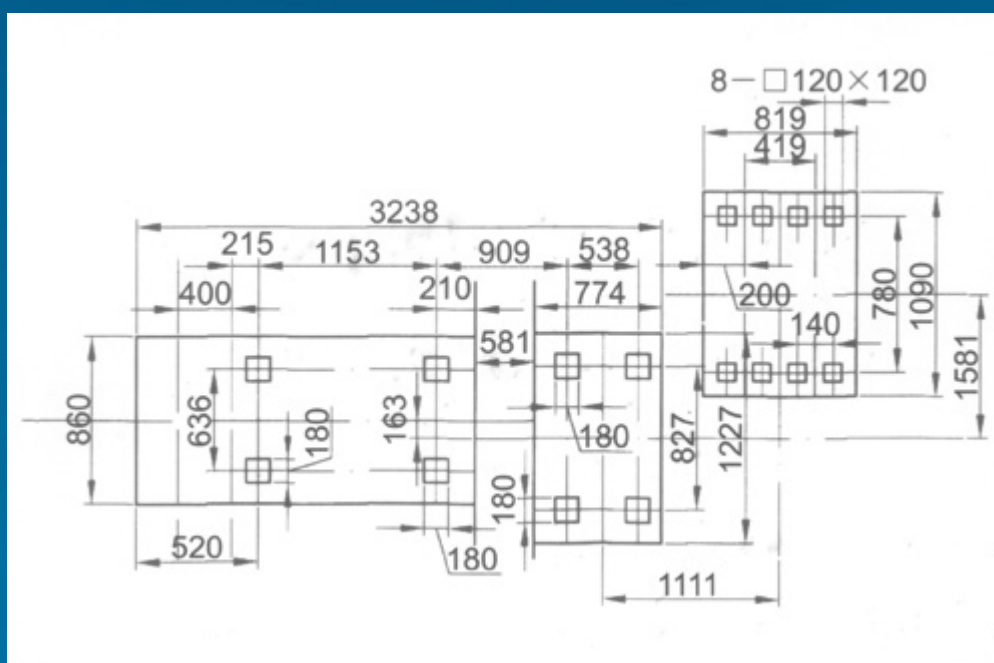

## FEATURES:

1. High capacity, less installation space, little power consumption and simple control & maintenance.
2. Pre-pressed cake, being loose but not crushed, is helpful to solvent penetration.
3. The percentage of oil and water content in cake are suitable for solvent extraction.
4. The pre-pressed oil is of higher quality than that obtained by single pressing or single solvent extraction.

## TECHNICAL DATA:

1. Capacity: 140-160tons/24hr. (sunflower kernel or rapeseed serving as an example)
2. Residual oil content in cake: 15~20%(under normal conditions)
3. Power: 55kw 15kw
4. Net weight: 9280kgs.approx.
5. Overall dimensions(L×W×H): 3708×1920×3843MM

## Foundation sizes:
